# Rearing Discussion

- Favorable environmental conditions? Unfavorable?
- Cage type / size / capacity / population size in cages / different cages for different sizes?
- Food sources? What works and what doesn't?
- Collections? Diapausing vs. Non-diapausing? Should we incorporate field collections at all?
- Parasites and pathogens?

# Pest Status Discussion

- Factors that may favor BMSB establishment and build-up? Factors that aren't?
- Abiotic conditions?
- Host plants? Crop rotations?
- Biological control?

# Native Biological Control?
