2017 UMass Rimpro Advisory Service

Jon Clements, Dan Cooley,
and Elizabeth Garofalo

Welcom at the RIMpro Cloud Service !

Real time information and forecast of pest and disease development

RIMpro Cloud Service is an interactive Decision Support System (DSS) for pest and disease management in fruit and wine grape production.

For many growers and consultants RIMpro is their essential tool for effective crop protection.

Connect your weather station to the system in minutes.

Grower

As grower you connect your on-farm weather station to the system. You simply use the default settings or set the parameters to your local conditions and experiences. You can enter your fungicide treatments and follow the estimated residual effect in time.

2017 UMass Rimpro Advisory Service

- Funded by New England Tree Fruit Research Committee and participants
- 50/50, \$150 each, actual cost for individual RIMpro \$250, some extra money for UMass
- Original objective was to have ten growers/sites...

- Whoops! We ended up with 21 sites!!!
- and operated at a loss, because each additional site costs \$200!
- but that is OK

Comparison of virtual (Meteoblue) vs. hardware/weather station (NEWA)

End of season survey...

Did your RIMpro site use virtual (Meteoblue) or weather station (Rainwise/NEWA) weather data?

11 responses

End of season survey...

Which RIMpro models did you use? (check all that apply)

11 responses

End of season survey...

How confident are you making orchard management decisions based on RIMpro output?

11 responses

- Completely, 100% confident
- Somewhat confident, I still consulted other sources for final decision-making
- I need more support on using RIMpro to become confident

End of season survey...

Will you continue to use RIMpro in the future?

11 responses

- Absolutely, I will sign up on my own at \$250 annual cost
- Yes, with support from this or similar advisory group and Extension, cost TBD
- No, not very likely...
- yes, Cost isn't an issue, I did appreciate support form Extension

Thank you to RIMpro growers...
